

## **Eike Mantwill returns to Riedel Cooling and takes over the Projects & Solutions division.**

**Kulmbach.** Eike Mantwill has been team leader for Projects & Solutions at Glen Dimplex Deutschland GmbH for Riedel Cooling division, since July 1, 2021.

He is responsible for the further expansion of customer-oriented product solutions for cold water units, composite and water management systems as well as large heat pump solutions for commercial and industrial use.

“We were able to win a proven expert for this position. Eike Mantwill is a great enrichment for our team, both personally and professionally, and we are convinced that together with him we can bring Riedel Cooling even further,” emphasizes Sascha Paulus, Business Unit Director Cooling.

After studying mechanical engineering at the TU Dresden, Eike Mantwill has been at home in refrigeration technology for more than 18 years and is a specialist in customer-oriented and innovative solutions in the field of industrial cold water generation.

“I am delighted to be working for Riedel Cooling again and to be able to contribute my many years of experience in the project business. Together with the team, I want to strengthen the company in the area of cooling and further expand our market position”, says Eike Mantwill.

### **About Glen Dimplex Deutschland and Glen Dimplex Group:**

Glen Dimplex Deutschland is part of the international Glen Dimplex Group based in Ireland - a leading international supplier of electric heating solutions and domestic appliances.

Glen Dimplex Deutschland combines the group's global knowledge and expertise in the development of highly efficient system solutions for heating, cooling and ventilation of buildings, as well as commercial and industrial applications and supplies the Dimplex, Riedel Kooling and Koolant Koolers brands. As well as the headquarters in Kulmbach, Glen Dimplex Deutschland also has subsidiaries in Kalamazoo (USA) and Shenyang (China). The company is managed by CEO Clemens Dereschkewitz.

Under the Riedel Kooling brand, the company bundles its sustainable, individual cooling solutions for a wide variety of applications in the professional environment, from laser machines to magnetic resonance tomographs to 3D printers. The range includes customer-specific individual projects, small series and large series with several 20,000 cooling solutions per year.

At its HQ in Kulmbach, Glen Dimplex has stood for expertise in heating and refrigeration for over 40 years. This is where energy-efficient heating and air-conditioning systems are designed by our engineers and technicians at our in-house Development department and perfected to market maturity. Products from Glen Dimplex are a byword for engineering expertise, quality and "Made in Germany" design. Glen Dimplex Deutschland's worldwide locations employ around 1,000 people.
